

Shared Support Services

PROVIDING PART-TIME SERVICES FOR CLIENTS WITH LESS THAN FULL-TIME NEEDS

Maintaining your Cognos environment often requires highly skilled resources to address ever fluctuating levels of need. Our clients know that keeping up with these demands on their own is an uphill battle, which is why they have turned to the consultants at LPA.

“Weiler Corp often required consultant-level support but couldn’t justify a full-time resource. LPA provides just what we were looking for.”

Jeff Smith, VP Information Technology

LPA Support Services offers clients access to our highly skilled staff on a part-time basis. Using this model, we work with our clients to determine their level of need, then craft a support plan to meet their specific requirements.

By matching our resources with your predictable demand, we offer a highly focused, highly efficient outsourced service to your organization. Our approach offers these services on a remote basis, saving money normally spent on T&E charges, and lowering the cost of getting consultant-level services when you need them.
