

LPA CompassSM Implementation Methodology for IBM Cognos Business Analytics

**PROVEN IMPLEMENTATION PROCESSES TO
GET YOUR IBM COGNOS BUSINESS ANALYTICS
PROJECT STARTED FAST AND MOVING IN THE
RIGHT DIRECTION**

Well implemented Business Intelligence and Data Warehousing projects can provide huge benefits and transform your business. However, without proper design, implementation and management, these projects can cost a fortune and take years to complete.

For years, LPA has used its **CompassSM Implementation Methodology for Business Analytics** to help clients rapidly realize benefits from business intelligence, reporting, financial performance management and data warehouse projects.

The **CompassSM Implementation Methodology for Business Analytics** consists of four phases (Discovery, Construction, Deployment, Continuation) that are linked together to provide a full lifecycle process. It combines decades of proven implementation practices with IBM Cognos software, well defined deliverables and knowledge transfer, so that LPA clients can quickly realize project benefits and improve their business operations.
