

# LPA Compass<sup>SM</sup> Implementation Methodology for Analytics

**PROVEN IMPLEMENTATION PROCESSES TO  
GET YOUR ANALYTICS PROJECT STARTED FAST  
AND MOVING IN THE RIGHT DIRECTION**

Well implemented analytics and data ware-housing projects can provide huge benefits and transform your business. However, without proper design, implementation and management, these projects can cost a fortune and take years to complete.

For years, LPA has used its **Compass<sup>SM</sup> Implementation Methodology for Analytics** to help clients rapidly realize benefits from business intelligence, reporting, financial performance management and data warehouse projects.

The **Compass<sup>SM</sup> Implementation Methodology for Analytics** consists of four phases (Discovery, Construction, Deployment, and Continuation) that are linked together to provide a full lifecycle process. It combines decades of proven implementation practices with IBM software, well defined deliverables and knowledge transfer, so that LPA clients can quickly realize project benefits and improve their business operations.
